

Make 'n Take Sheet

Discover How Easy It Is To Make Your Own Assistive Technology!

ABLE
Tech

Adapted Puzzle

Adding knobs to puzzle pieces provides an easy grip allowing the child to play with the puzzle independently.

Materials:

Bag of wooden knobs
purchased in a hobby, art,
or hardware store

Hot glue gun and glue sticks

Wooden or heavy cardboard
puzzle with large pieces

Directions:

1. Choose location for the knobs that will avoid covering the puzzle pictures.
2. Place hot glue on the puzzle location.
3. Attach the knob to the hot glue using a twisting motion.
4. Allow drying overnight before your child plays with the new puzzle.

Oklahoma ABLE Tech, the statewide Assistive Technology Act Program, is funded through the Administration for Community Living of the U.S. Department of Health and Human Services, and maintains coordination and collaboration efforts with partners throughout the State of Oklahoma.
