

# Make 'n Take Sheet

*Discover How Easy It Is To Make Your Own Assistive Technology!*

## Playing Card Holder

Sometimes children have a hard time holding all of their playing cards in one hand. This DIY easily makes that accomplishable.

### Materials:

- 2 Lids (One slightly larger than the other)
- 1 Brass fastener
- Scissors

**Make-N-Take Price: \$2.00**

### Directions:

1. Place the small lid right over the large lid (top to top)
2. Use the scissors to poke a tiny hole in the middle of both lids
3. Push the brass fastener through both lids and secure it

**Helpful Hints:** You can also use a pool floaty for a stand-up card holder (see below).

Oklahoma ABLE Tech, the statewide Assistive Technology Act Program, is funded through the Administration for Community Living of the U.S. Department of Health and Human Services, and maintains coordination and collaboration efforts with partners throughout the State of Oklahoma.
