

Make 'n Take Sheet

Discover How Easy It Is To Make Your Own Assistive Technology!

Light Box and Alphabet Cups

Light Boxes are great for learning all the types of things like sensory play, spelling, math, etc. and this is a great alternative to buying on!

Materials:

- 1 Large, opaque, under bed storage tub
- 2 strings of christmas lights
- Large sheets of parchment paper
- Sticky tape
- Small plastic cups
- Sharpie

Make-N-Take Price: \$20.00

Directions:

1. Line the bottom of the lid with the parchment paper to dull and disperse the light.
2. Spread the strings of lights around the box, connected, and have one power connector hanging out to plug into an outlet or extension cord.
3. Write a letter of the alphabet and numbers on the plastic cups.
4. Turn the string lights on, the lights off, and play!

Oklahoma ABLE Tech, the statewide Assistive Technology Act Program, is funded through the Administration for Community Living of the U.S. Department of Health and Human Services, and maintains coordination and collaboration efforts with partners throughout the State of Oklahoma.
