

Assistive Technology Purpose, Policy, Procedures

Device Demonstration Program

Moore Autism Center
1040 S.W. 4th Street
Moore, OK 73160
Phone: (405)735-8478
Fax: (405)735-6699

Purpose:

The purpose of the Assistive Technology Device Demonstration Program is to offer individual and caregiver exploration of one or more assistive technology devices to assist in decision making about device purchase or utilization. In addition, the demonstration program can offer guided experiences for individuals and caregivers with a particular device to support effective usage.

Policy:

1. The Moore Autism Center is available by appointment only by calling (405)735-8478.
2. Upon completion of a speech, language and/or augmentative/alternative communication device evaluation, devices are available for demonstration and trial as part of therapeutic treatment.
3. Device demonstration is also available without evaluation and treatment at a self-pay rate.
4. Requests for equipment demonstrations may be made by a person with a disability, family members, advocates or service providers (e.g. therapist, teacher, rehabilitation counselor).
5. Not all devices available for demonstration are available for short term loan through the ABLE Tech Equipment Loan Program. If interested in borrowing equipment after a demonstration, assistance can be provided by the speech language pathologist to inquire about availability and loan procedures.
6. If demonstration and trial of a device results in effective usage as part of therapeutic treatment, you will be assisted by your speech language pathologist in the process of obtaining a personal device.

Procedures:

1. Call Moore Autism Center to set an appointment time.
2. If seeking evaluation and treatment, you will need to obtain a referral from your primary care physician for evaluation and treatment of speech, language and use of a speech generating device.
3. If only interested in a demonstration with self-pay rates, no doctor's referral is necessary.
4. Additional procedures will be determined upon results of demonstration, evaluation and/or therapeutic treatment.

Device Categories:

Speech Communication

Speech Generating Augmentative or alternative communication devices
